PACK IT YOUR WAY

**laferpack**

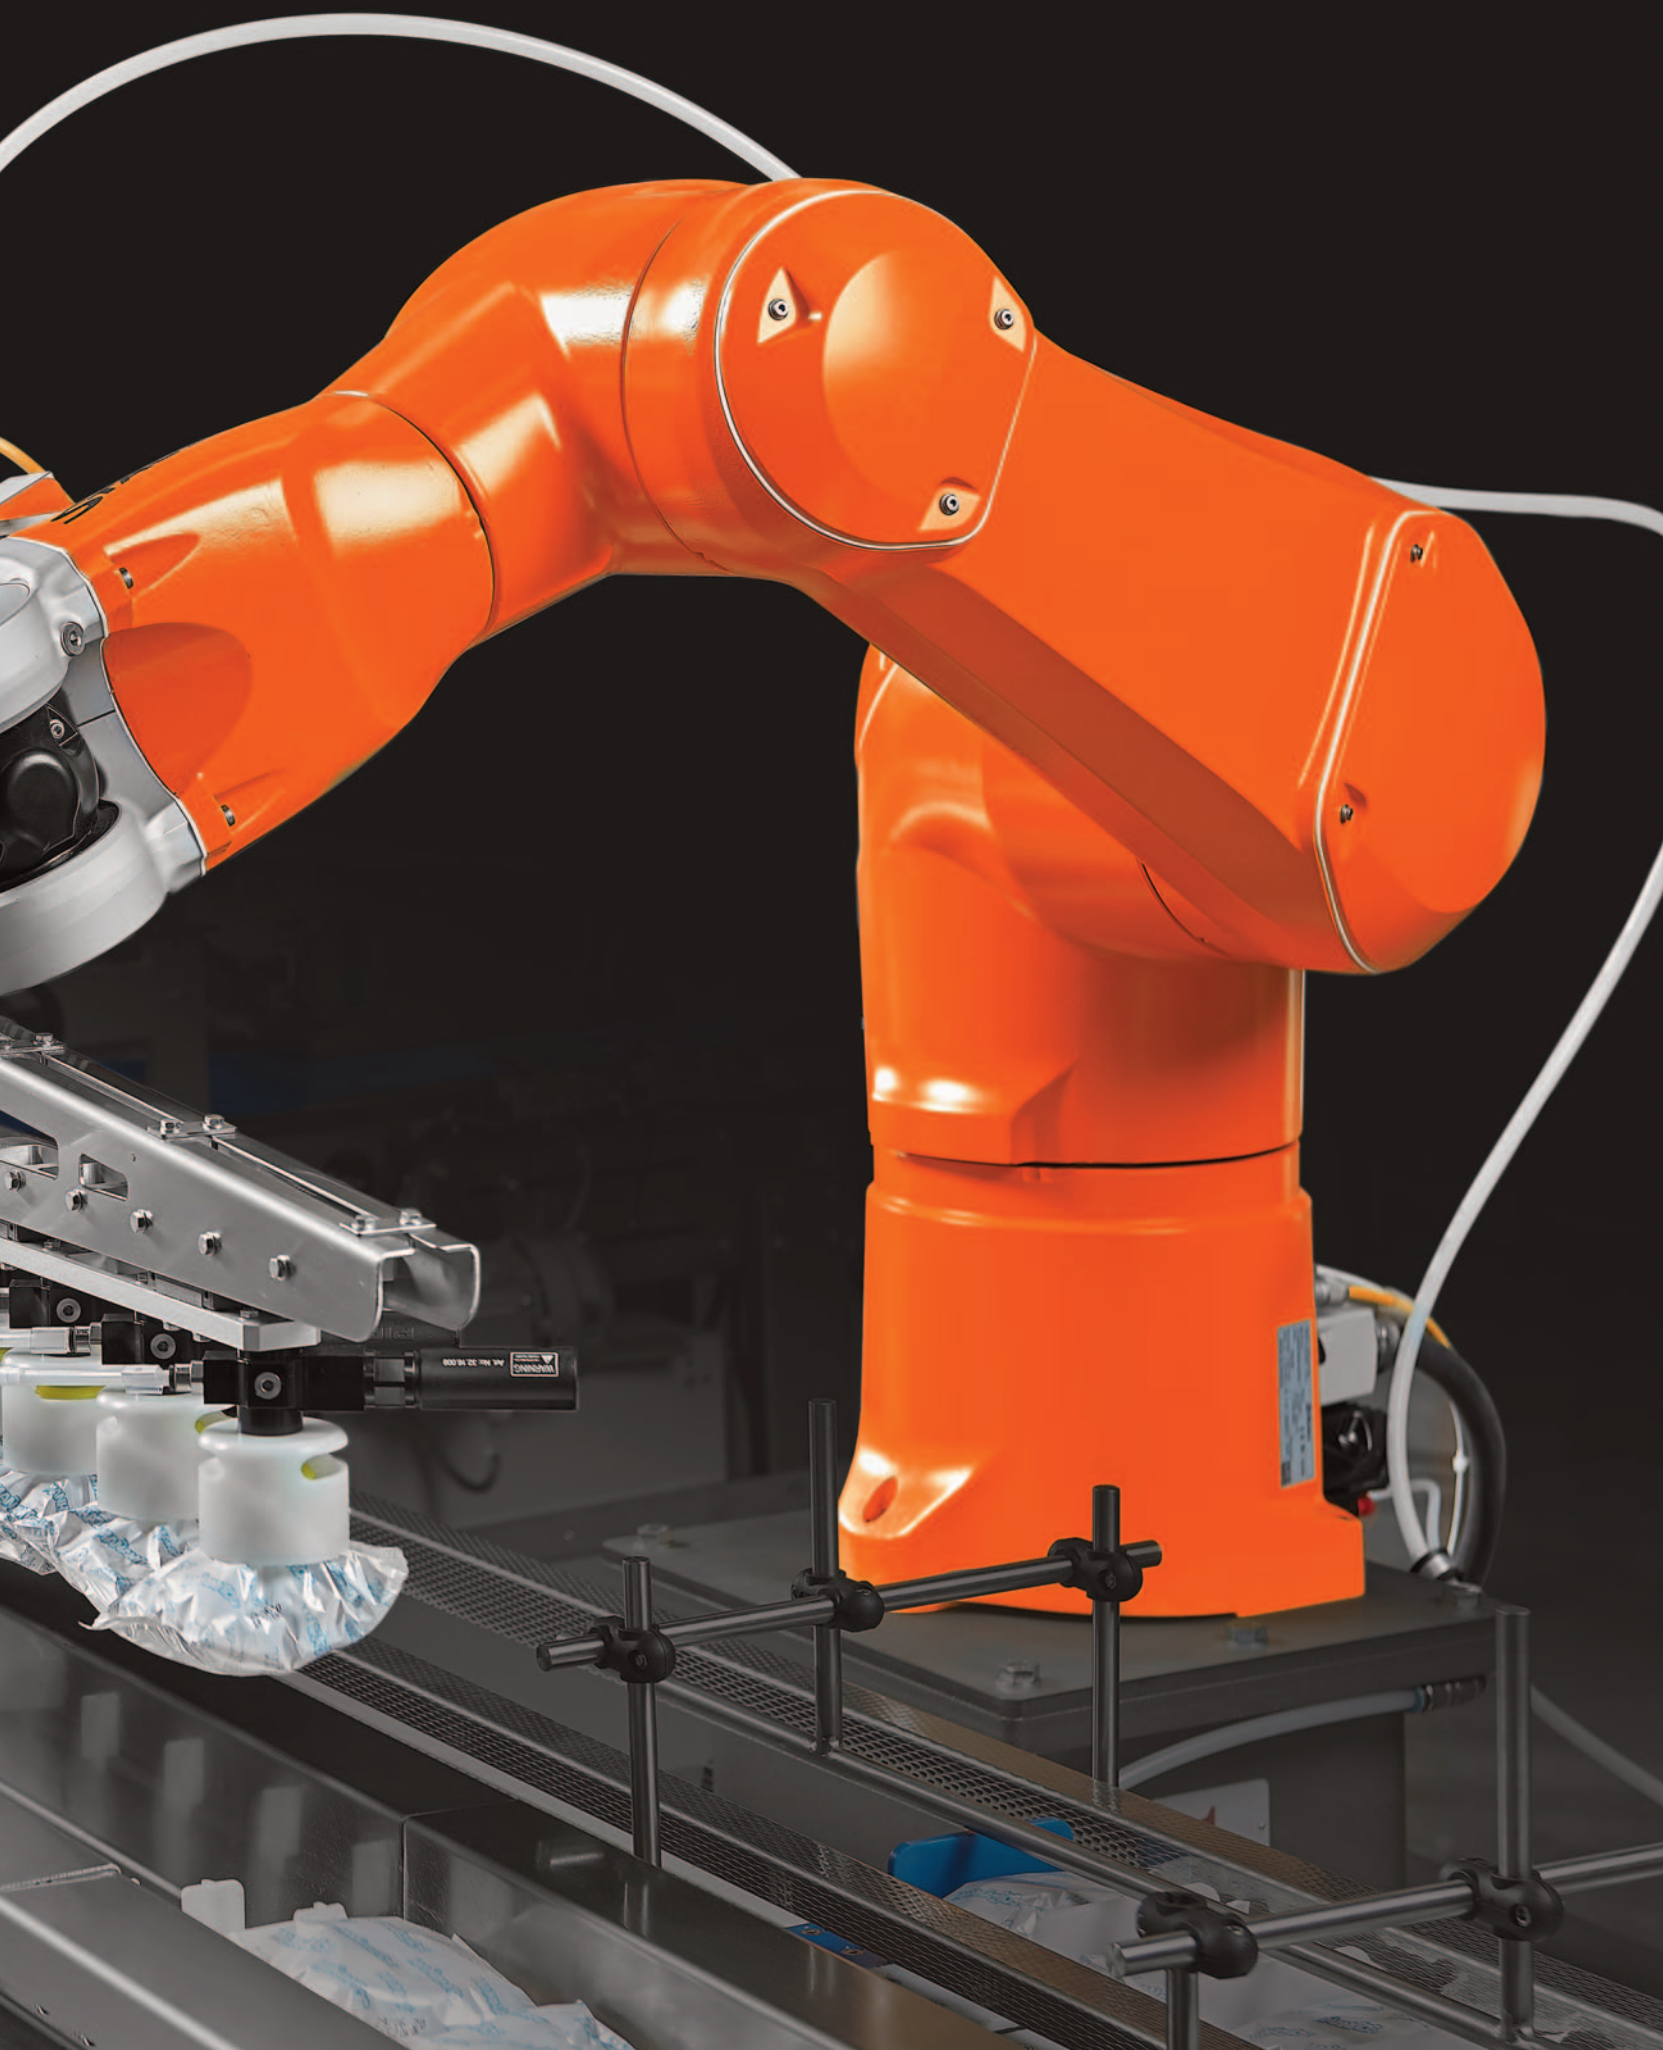

Passion, expertise and an unwavering commitment to exceeding customer expectations drive everything we do. In the world of packaging machinery, the human element remains at the heart of our innovation.

We believe that a wrapper's true value lies not just in its performance but in how seamlessly it integrates into real-world operations. Every customer is a partner, bringing visions to life while we transform ideas into intelligent, efficient and future-ready solutions: designed, tested and optimized for success.

Every project is a step toward continuous improvement. Our machines are more than just equipment; they are intuitive, reliable and cost-effective tools designed to simplify operations and empower the people who use them every day. By leveraging cutting-edge technology, we optimize performance, enhance efficiency and minimize energy consumption without ever losing sight of the people behind the process.

**Because true innovation isn't about complexity:  
it's about making things work better. Simplicity is the ultimate sophistication.**

# PLANET A

THE NEW FRONTIER  
OF THE ESSENTIAL

Full servo top reel flow wrapper with three Brushless motors especially designed for manual loading, with the same strengths of the high-level Laferpack machines: cantilever structure; 7" user-friendly colour touch-screen; complete access to the operation area.

# PLANET B

INVERTED SIMPLICITY

Full servo bottom reel flow wrapper with three Brushless motors especially designed for manual loading, with the same strengths of the high-level Laferpack machines: cantilever structure; 7" user-friendly colour touch-screen; complete access to the operation area.

Technical Specs		PLANET A	PLANET B
Maximum width of the product	mm	180	180
Maximum height of the product	mm	100	100
Bag length (min/max)	mm	80 / 530	80 / 530
Maximum reel width	mm	500	500
Max Speed	p.p.m.	60 / 120	60 / 120
Wrapping materials		heat & cold sealable materials	

*The data serves as a guideline; each machine can be entirely adapted to the customer's specific requests.*

PLANET A

PLANET B

COSMIC

WIDE B

# COSMIC

ROBUSTNESS AND FLEXIBILITY  
OF USE TO REMOVE THE ENTRY  
LEVEL CONCEPT

Full servo suitable for manual loading or integrated with low/medium speed automatic lines.

The same strengths of the top-range machines are applied on COSMIC: balcony frame execution, friendly use HMI graphic software, complete access to the operation area of the machine protected by a robust safety cover and a wide range of options.

Technical Specs		COSMIC
Maximum width of the product	mm	250
Maximum height of the product	mm	120
Bag length (min/max)	mm	50 / 600
Maximum reel width	mm	650
Max Speed	p.p.m.	150
Wrapping materials	heat & cold sealable materials	

*The data serves as a guideline; each machine can be entirely adapted to the customer's specific requests.*

# WIDE B

THE ALTERNATIVE FOR  
DIFFICULT PRODUCTS

Full servo suitable for manual loading or to be linked in low/medium speed automatic lines.

The bottom film feed (reverse flow pack) allows the packaging of products difficult to be handled with different solutions.

Ideal application for food (loose vegetables, fish...), and non-food (plastic and hardware items, clothes...).

Technical Specs		WIDE B
Maximum width of the product	mm	250
Maximum height of the product	mm	120
Bag length (min/max)	mm	50 / 600
Maximum reel width	mm	650
Max Speed	p.p.m.	150
Wrapping materials	heat & cold sealable materials, compostable, paper and recyclable film	

*The data serves as a guideline; each machine can be entirely adapted to the customer's specific requests.*

# MOTION A

DEAL WITH SIMPLICITY  
IN COMPLICATED APPLICATIONS

---

The box motion cross sealing head allows to obtain hermetic seals for gas flushing packaging (MAP). The perfect solution when an aesthetically pleasing design and high quality gussets are required and in cases of packaging with thick wrapping materials. Bottom reel version available.

# MOTION B

HIGH PERFORMANCES,  
FLEXIBILITY AND HERMETIC SEALING  
IN A SINGLE SOLUTION

---

Bags with hermetic seals containing products that are difficult to handle are obtained by using a “box-motion” sealing head combined with bottom film feeding.

MOTION A

MOTION B

Technical Specs		MOTION A	MOTION B
Maximum width of the product	mm	320	320
Maximum height of the product	mm	120	120
Bag length (min/max)	mm	80 / 600	80 / 600
Maximum reel width	mm	750	750
Max Speed	p.p.m.	80	80
Wrapping materials.		heat & cold sealable materials, compostable, paper and recyclable film	

*The data serves as a guideline; each machine can be entirely adapted to the customer's specific requests.*

ABILITY

# FAST

## Rationality and synthesis of technology for high-performance applications

Designed and built for continuous use in automatic lines. Fully electronic machine developed for high performance platform. Equipped with double pneumatic reel holder shaft, automatic reel splicer, longitudinal seal assembly with preheating device, cross sealing head with double jaw, friendly use HMI graphic software with provision for printer and up-stream/down-stream control interface.

Technical Specs		FAST
Maximum width of the product	mm	120
Maximum height of the product	mm	60
Bag length (min/max)	mm	80 / 250
Maximum reel width	mm	400
Max Speed	p.p.m.	600
Wrapping materials	heat & cold sealable materials	

*The data serves as a guideline; each machine can be entirely adapted to the customer's specific requests.*

# DISKO

COMPACT AND FULLY  
AUTOMATIC

Fully electronic 4 axis high speed machine specifically designed for packaging of candies and hard confectionery in Flowpack style.

The basic version provides single packing of products and can be equipped with proper optional devices to obtain:

# DISKO L

WHEN EFFICIENCY  
JOINS QUALITY

bags in chain with pre-cutting, multipack, packing of cicklets, packing of lollipops, inclusion of gift (plastic eggs, stickers, cards).

Technical Specs		DISKO	DISKO L
Maximum width of the product	mm	40	35
Maximum height of the product	mm	30	35
Bag length (min/max)	mm	47 / 75	90 / 180
Maximum reel width	mm	150	250
Max Speed	p.p.m.	1.500	550
Wrapping materials		heat & cold sealable materials	

*The data serves as a guideline; each machine can be entirely adapted to the customer's specific requests.*

DISKO

DISKO L

4S

4S \_ Single reel

4S \_ Double reel

**4-side seal profile,  
Robust in nature,  
A different concept  
of packaging.**

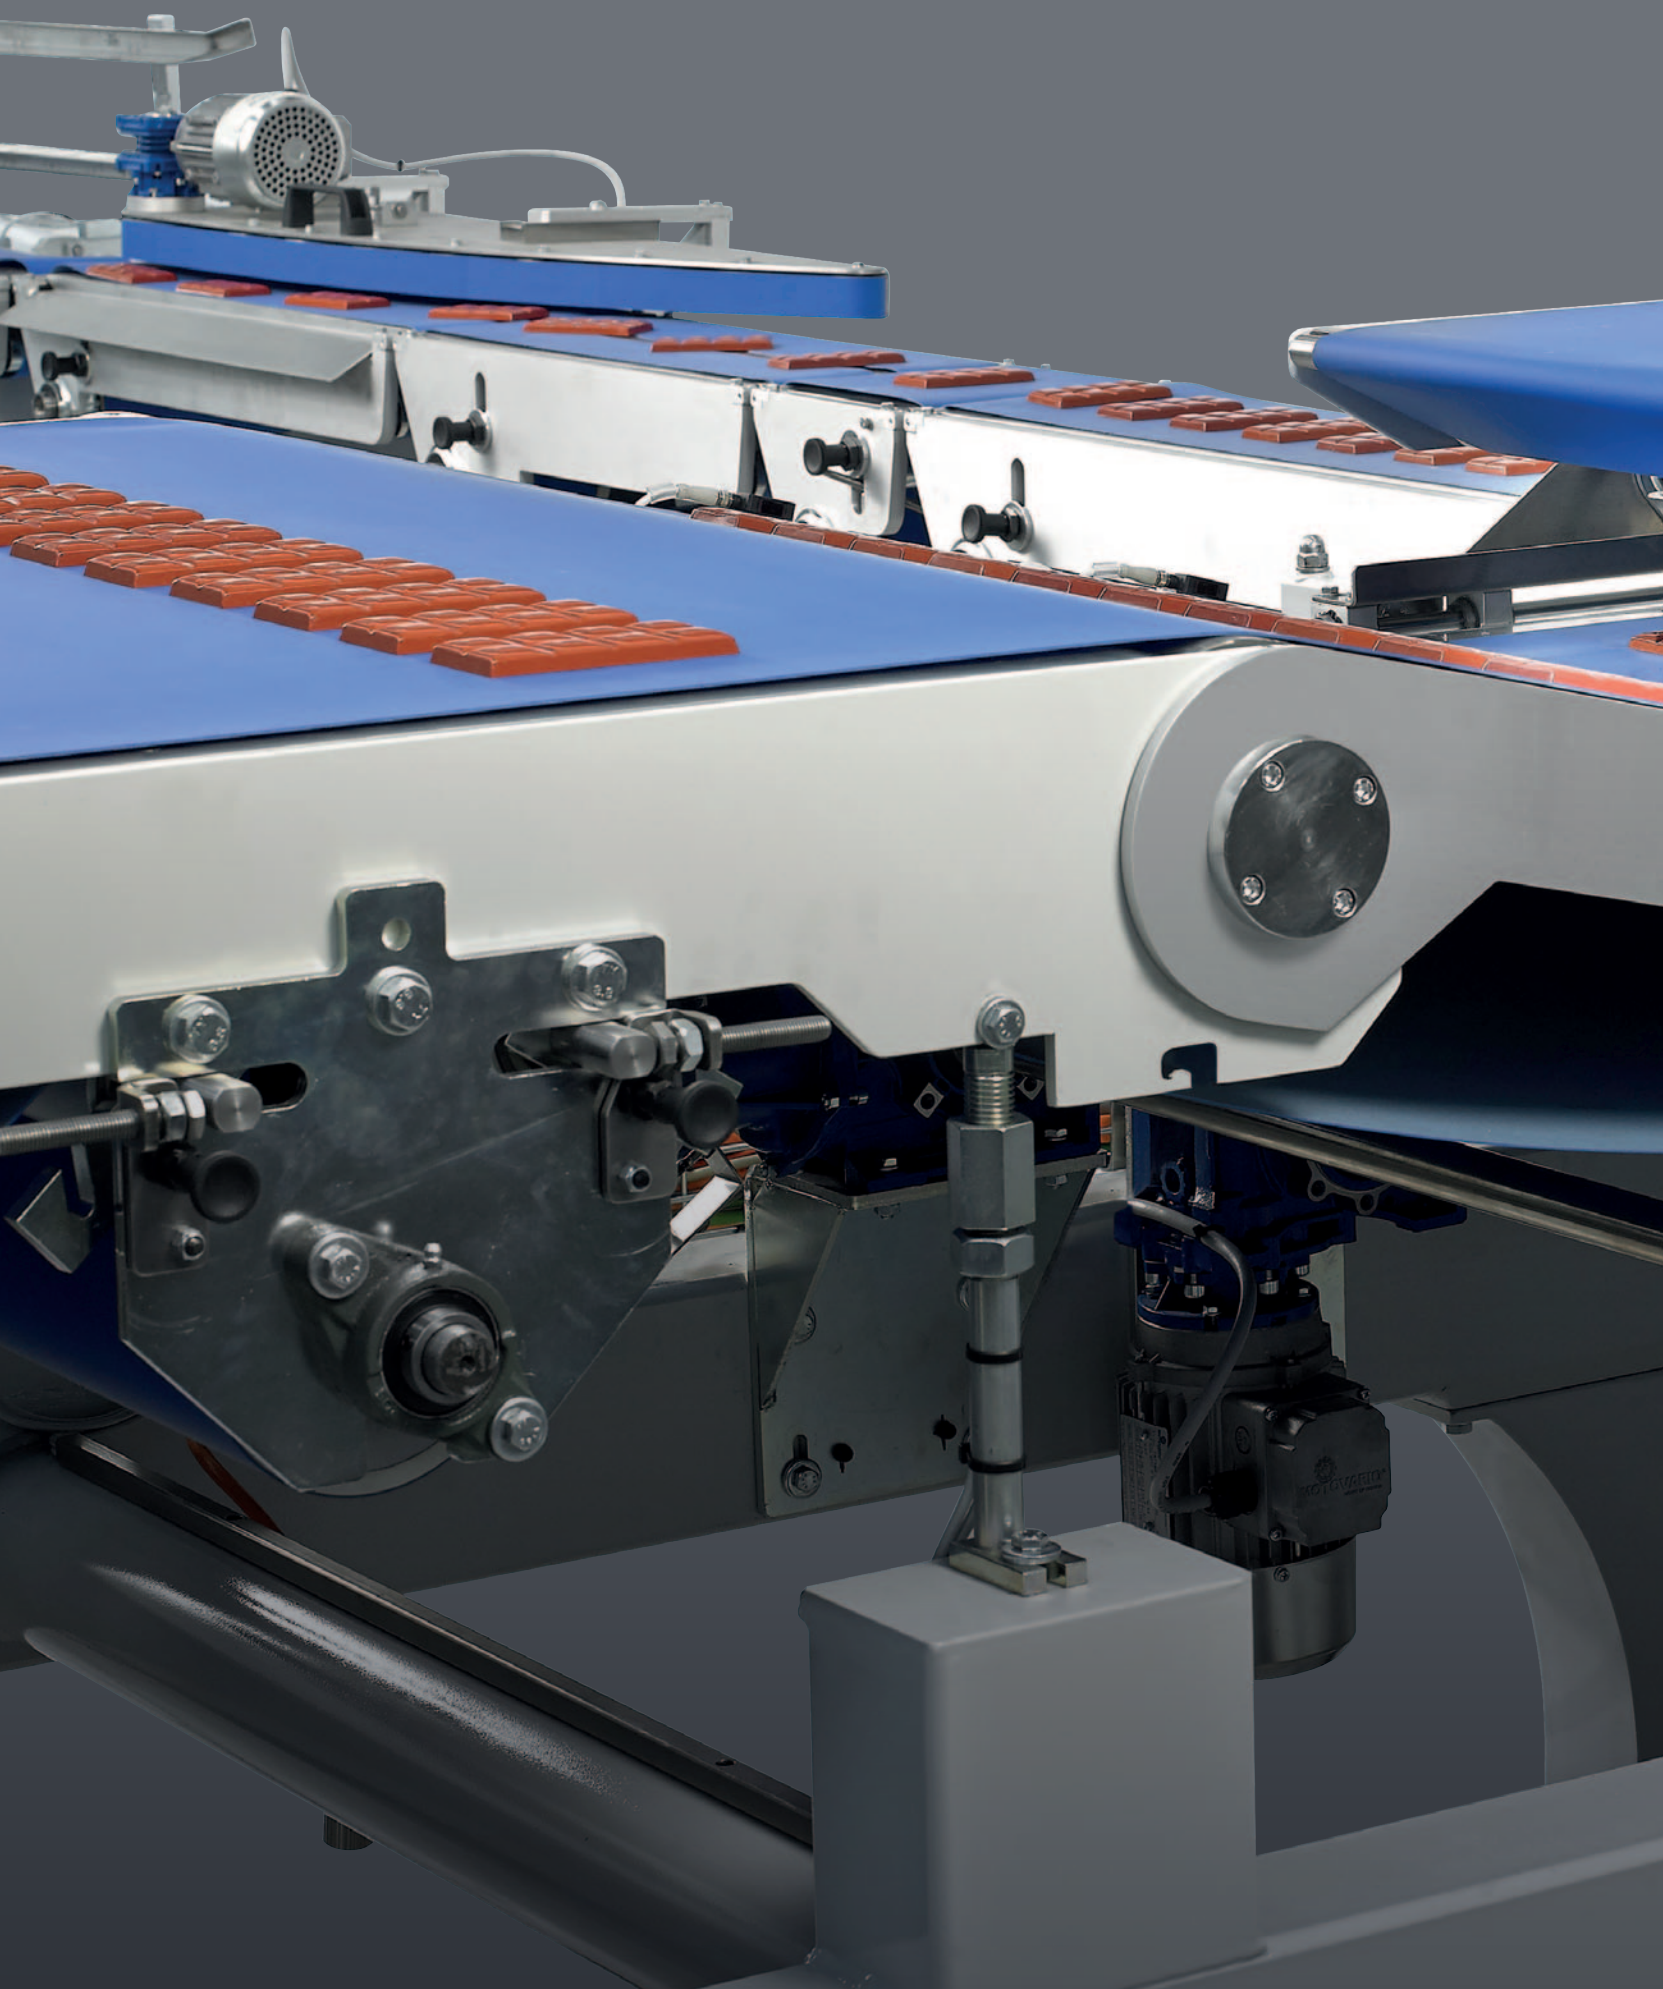

**4S**

A fully electronic high-speed machine able to make a four-sided seal bag from one or two film reels completely sealed on all four sides with no gussets. The sealing of all sides provides a uniform bag style and enhanced product protection from leakage.

Front and back sides are totally free to increase the brand messaging or to see the products better. The absence of the longitudinal flap and the reduced profiles of the seals reduce the space occupied by a single bag on the carton box.

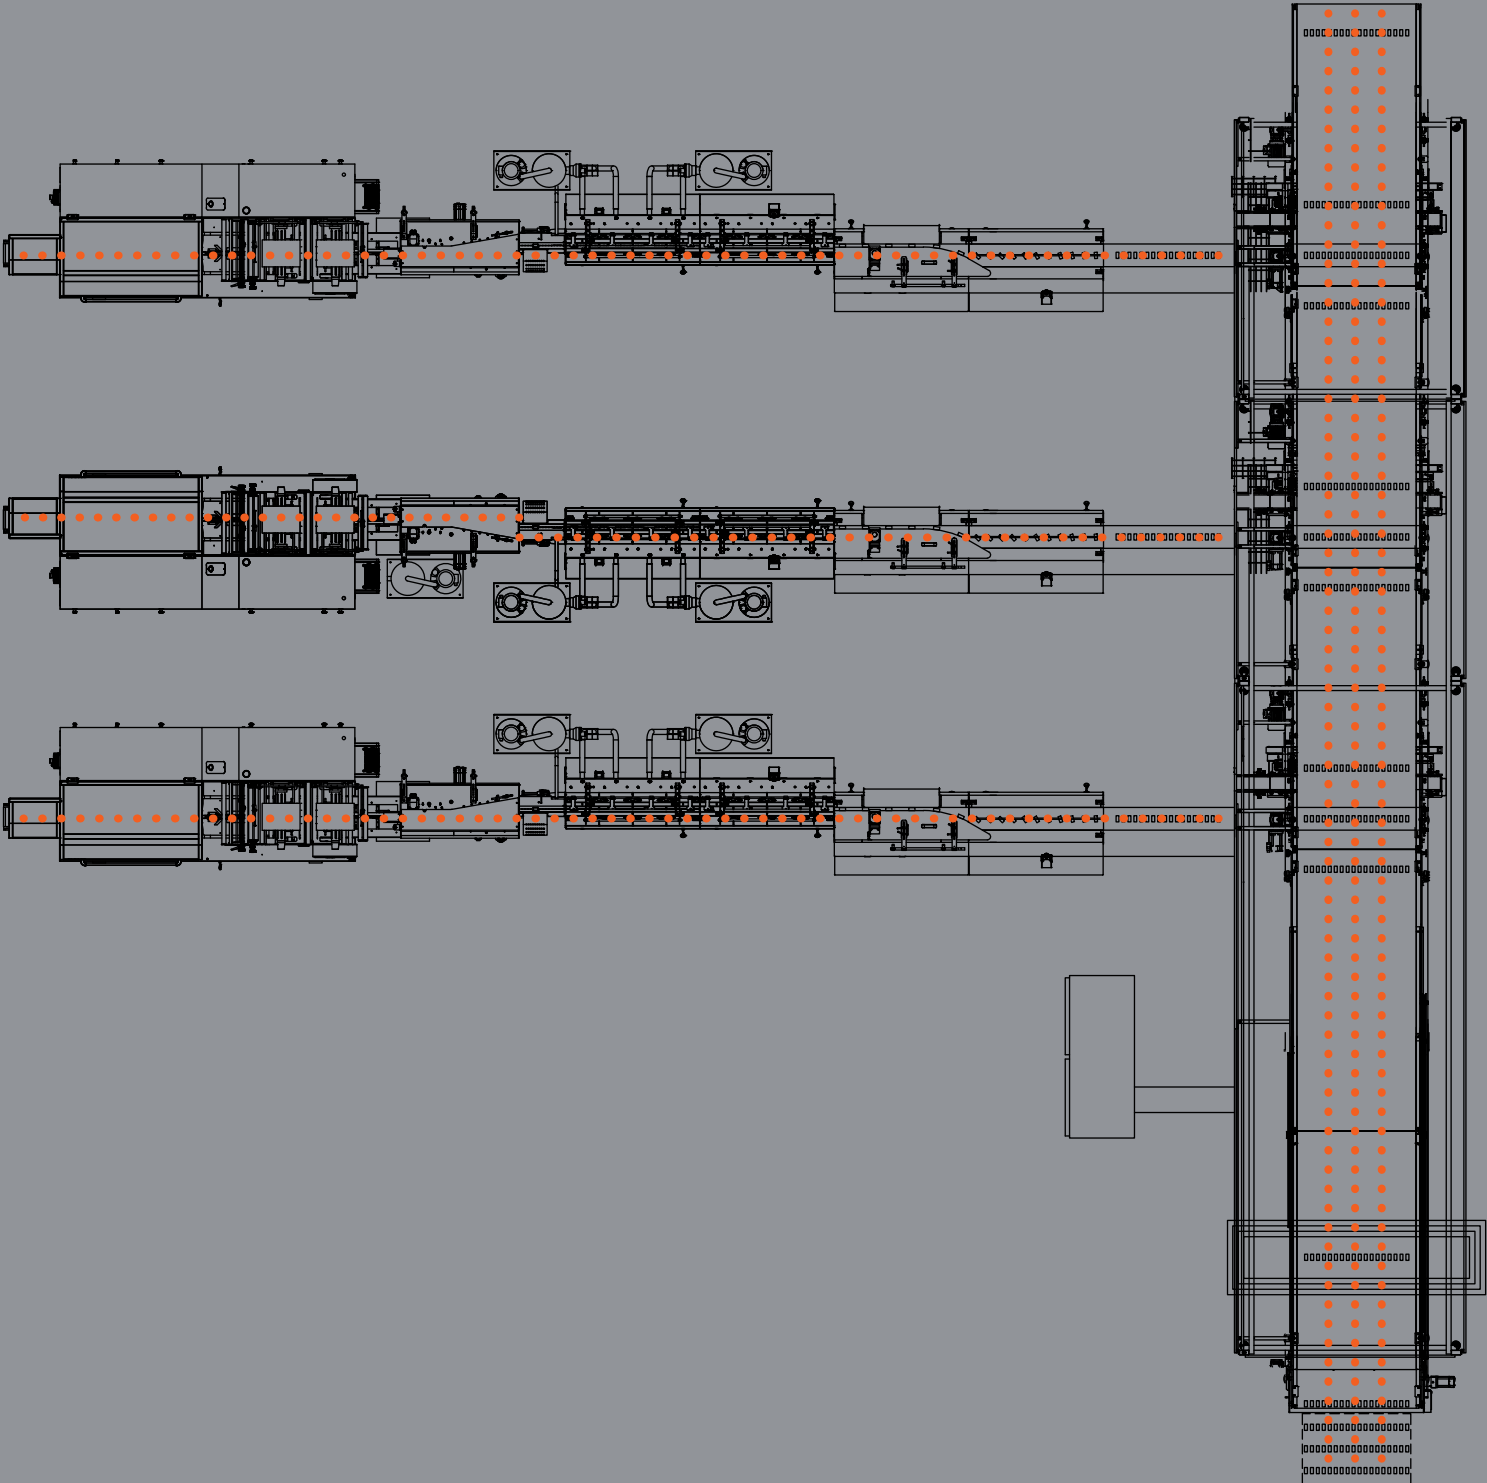

# AUTOMATIC INTEGRATED SYSTEMS

# PACKAGING LINES

Row distribution system for products arriving in regular rows

---

Feeding and portioning system suitable for handling of wafers

---

# PACKAGING LINES

Fully automatic system especially designed for bars arriving in aligned and regular rows

---

Row distribution system combined with electronic numerical loader for biscuits on edge

---

# PACKAGING LINES

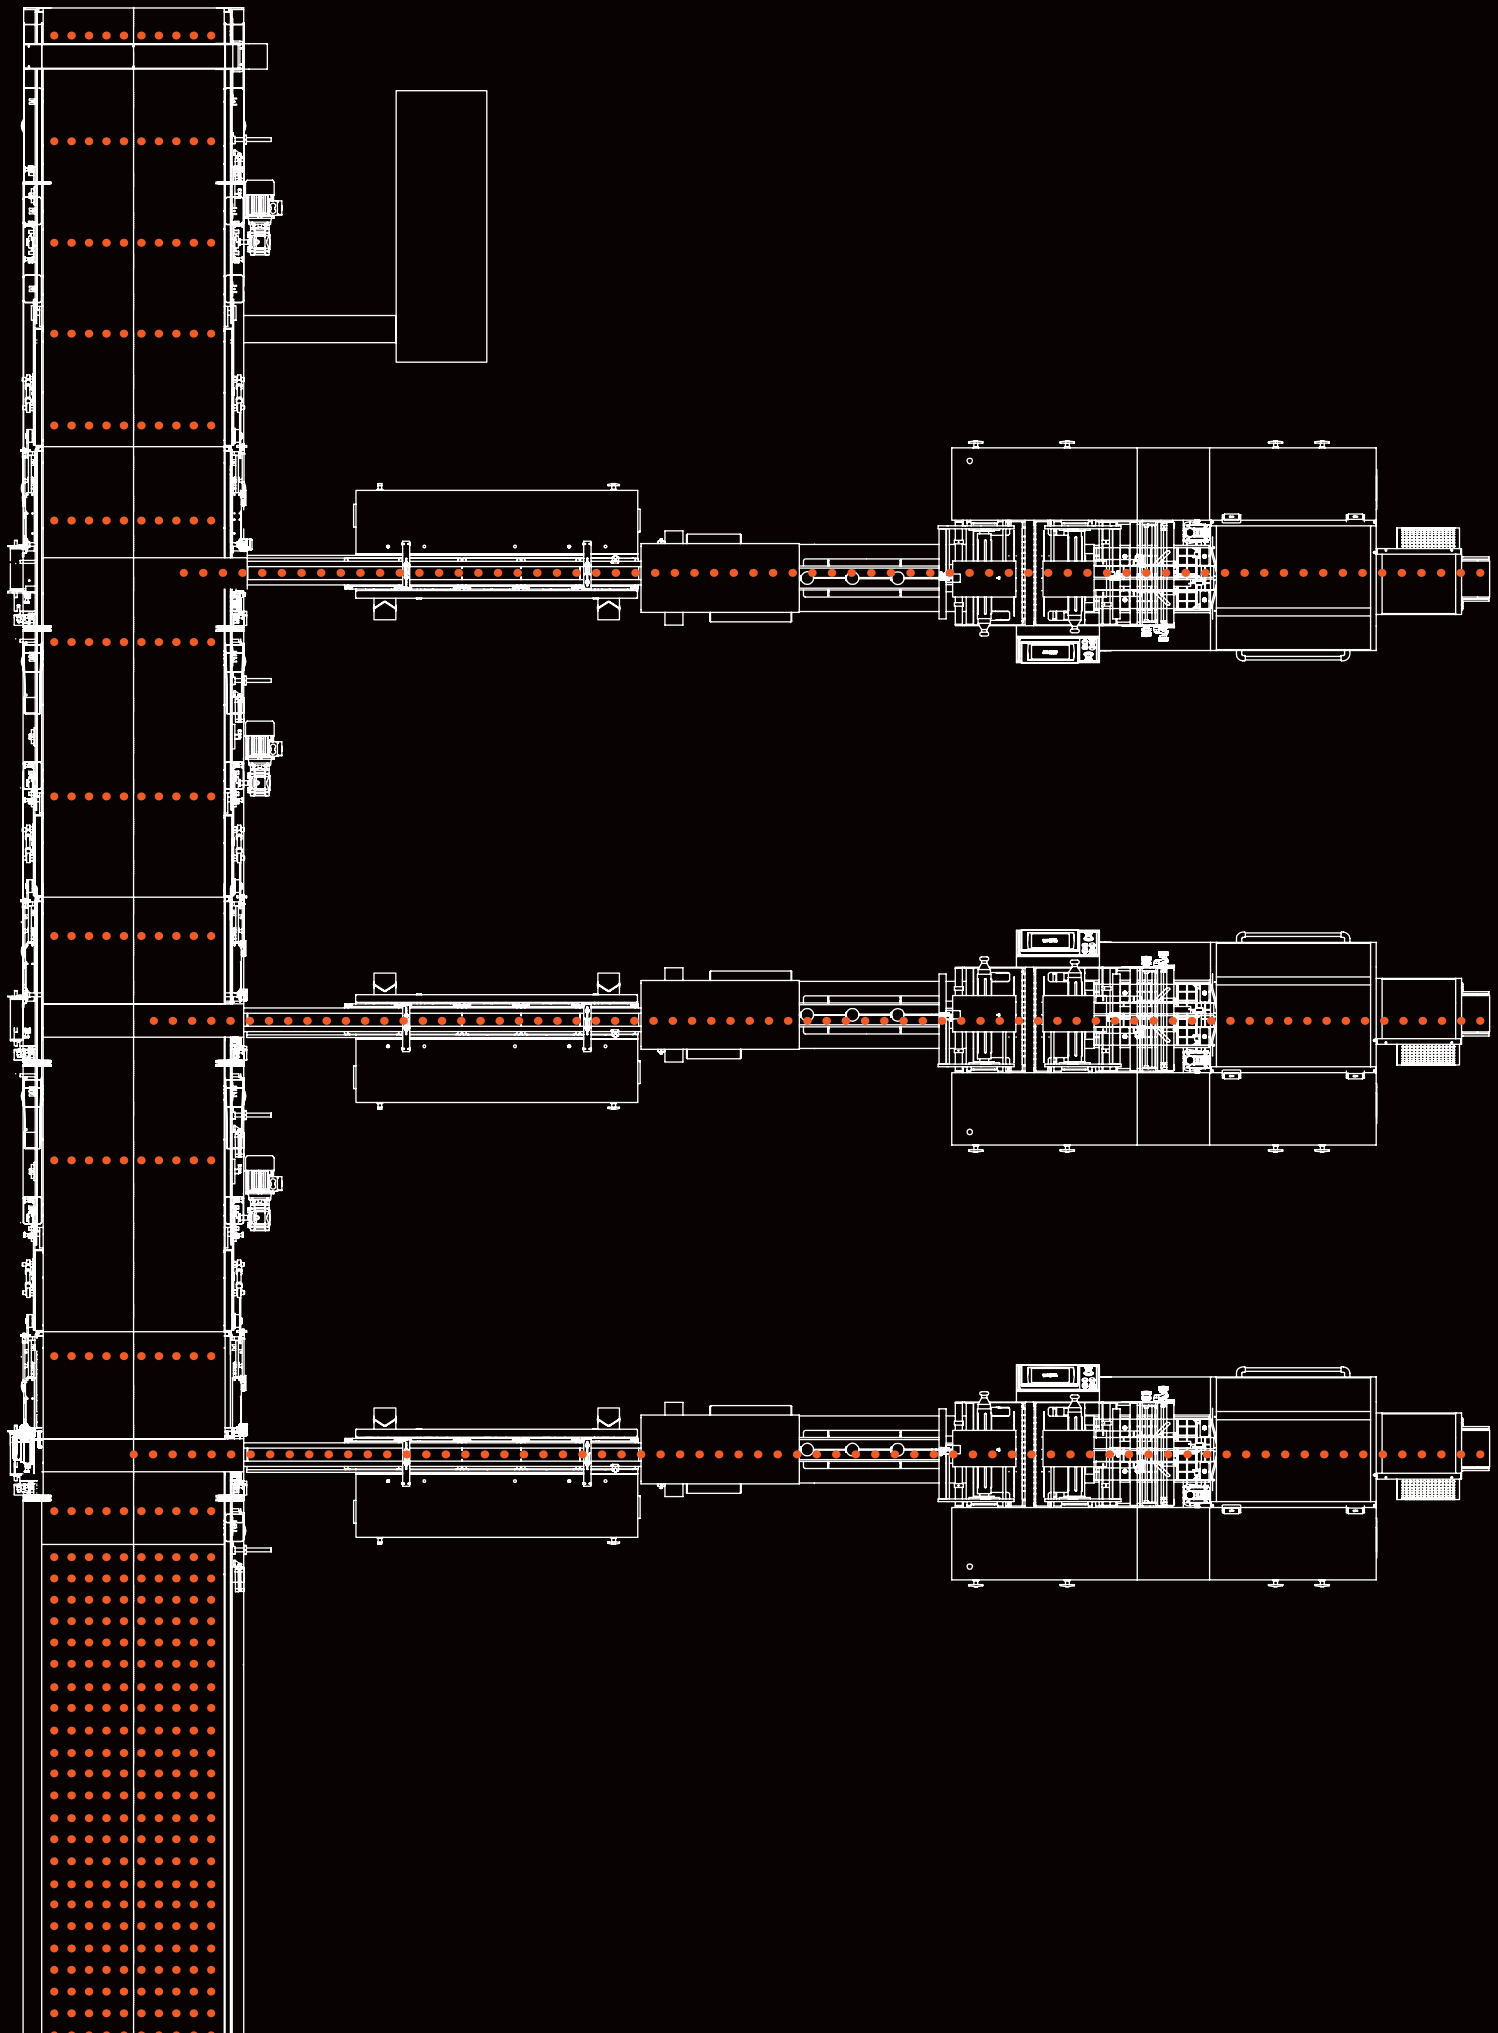

In-line feeding system with streamers suitable for small products arriving randomly

---

Packaging lines for products in trays
